## HOW IT WORKS

# THE ORDERING PROCESS

## 5 STEPS TO A TRAILER KIT

- 1 As the fleet operator, you contract a repair job and the reference to the BPW and PE fleet upgrade programme to your garage.
- 2 Using the VIN and axle number, the garage identifies the axle(s) to be replaced and decides on the extent of the repairs.
- 3 The parts are ordered from the affiliated trading partner, citing the VIN and axle number.
- 4 The retailer uses the ordering portal for the fleet upgrade programme, [order.trailer-kit.com](http://order.trailer-kit.com), to order the appropriate trailer kits using the retailer log-in.
- 5 After the order has been reviewed, BPW and PE promptly deliver the trailer kits directly to your garage.
